SITUATION SUMMARY

2017 Statewide Winter Storms

Cal OES Coastal Region

Paul's Slide, State Route 1, Monterey County

Per Cal OES Coastal Duty Officer (CDO), as of 1300 hours on 05/25/17, Paul's Slide on State Route 1 has been closed to all traffic.

- · Caltrans engineers report slide activity and the area has been closed in the interest of public safety.
- · Assessment will commence and further details will be provided once released.
- All deliveries and local access previously scheduled have been suspended.

Mud Creek Slide, State Route 1, Monterey County

The Mud Creek area on State Route 1 sustained a major slide on the evening of 05/20/17, when over a million tons of rock and dirt fell down the slope continuing down to the ocean floor 250 feet off the shoreline.

- The Mud Creek area is ¼ mile in length, made up of five slides, four of which fell during this single incident and consolidated into one slide. The remaining slide now extends 1,500 feet in length over State Route 1 and is about 35 to 40 feet deep.
- Roadwork at Mud Creek was suspended and heavy equipment removed last week due to the threat of new slides and for safety of highway workers. Caltrans geologists and engineers plan to assess it further when this area stabilizes.
- There is no estimate when this section of State Route 1, approximately nine miles north of the San Luis Obispo/Monterey County line will reopen.

Pfeiffer Bridge Incident, Monterey County

California Highway Patrol (CHP) and Caltrans had a hard closure on the Pfeiffer Bridge on HWY 1 at mile marker 45.52 (SB Sycamore Canyon and the Bridge) due to a crack in the bridge. The bridge has been demolished so the road is closed and estimates for some access from the north is late September 2017.

- Backup air medical transport plans have been developed for medical emergencies through Cal OES Law Enforcement Branch.
- All businesses north of the Pfeiffer Canyon Bridge closure are open to the public.

SITUATION SUMMARY

2017 Statewide Winter Storms

Cal OES Inland Region

River Forecast – The following river is forecast to meet or exceed Flood stage: Mariposa County:

- Merced River at Pohono Bridge is forecast to exceed flood stage at 10.0 feet the morning of 06/04/17.
 - Western portion of North Pines Campground, located at the east end of Yosemite Valley between the confluence of the Merced River and Tenaya Creek, begins to flood. Water rises to the base of the swinging bridge downstream from Chapel Meadow.

River Forecast - The following rivers are forecast to meet or exceed Monitor Stage:

- · Placer County: Truckee River at Truckee
- · Alpine County: East Fork Carson River at Markleeville, West Fork Carson River at Woodfords

Please see link for River Forecast Guidance - http://www.cnrfc.noaa.gov/

Cal OES Southern Region

River Forecast - The following river is forecast to meet or exceed Flood stage: Mono County:

- West Walker River at US 395 Below Little Walker is forecast to exceed flood stage at 6.0 feet the evening of 06/03/17.
 - Potential Impacts: Some minor flooding of lowlands, pastures, and rural roads.

Service Interruptions:

Circuit Interruption, Indio, Riverside County

On 06/01/17 at 1941 hours, the CA 9-1-1 Branch advised the California State Warning Center (CSWC) that according to Frontier, their Bermuda Dunes Central Office (CO) in Riverside County experienced a circuit disruption which affected 157 customers.

- The interruption began on 06/01/17 at 1600 hours.
- CHP Indio's Primary Rate Interface (PRI) was affected, however, 911 trunks and the Automatic Location Identifier (ALI) service was not affected. They are operational through the PSAP.
- · Frontier technicians are on site making repairs.

On 06/01/17 at 2346 hours, the CA 9-1-1 Branch provided an update:

- Per Frontier, there has been no change in status as of 2330 hours on their PRI work conducted at the Bermuda Dunes CO.
- The next report will be provided on 06/02/17 at 0900 hours.

Remote/Community Isolations:

· None reported

WEATHER SYNOPSIS BY REGION

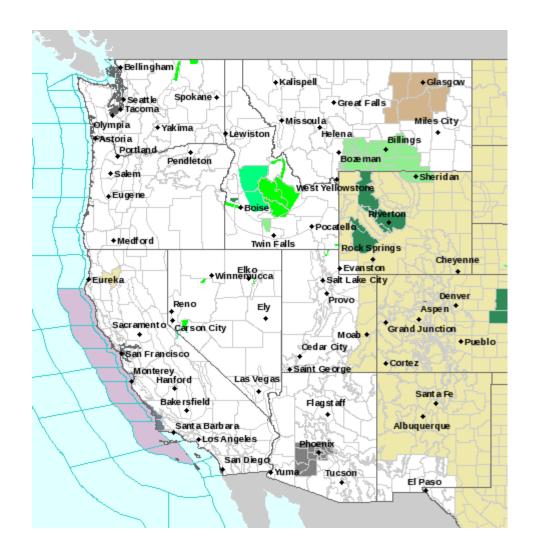

NORTHERN CALIFORNIA

Dry, warmer weather will prevail today and Saturday under the mentioned westerly flow, but later Saturday and Sunday another low pressure trough will be moving ashore that could bring some more showers to areas north of a line from about Cape Mendocino to Eagle Lake. A few wet thunderstorms could be possible then as well. Early next week dry, warmer weather returns again, but later next Wednesday another low pressure trough may arrive off shore. No significant, unseasonable wind conditions are expected for the next 7 days, although there could be some fairly typical gusty westerly afternoon winds in the western areas daily. Afternoon highs will likely be notably above normal early next week with the warmest inland areas 95-97 or about 10 degrees above seasonable.

SOUTHERN CALIFORNIA

A warmer and drier weather pattern is expected through the weekend. Along the central coast, local northwest winds of 15-25 mph will develop on Friday. By the weekend, most areas should see light winds. high temperatures will climb into the 70s along the coast and in the mountains to the mid 90s in the valleys. Minimum RH will fall into the teens for up to 6 hours each afternoon, beginning today, below 6,000 feet. A slow cooling trend may occur next week as a weak trough slips back into the Pacific Northwest. Longer range models indicate a much cooler and windier pattern may evolve the weekend of the 10th. No precipitation is expected through the period.
